

CYBERSECURITY

SECURITY DELIVERED

PATCH MANAGEMENT

Policy based patch management solutions for remote and hybrid workforces. Automatically identify and remediate vulnerabilities across your entire IT portfolio.

ENDPOINT PROTECTION

Monitor, manage, and protect endpoints across operating systems and device types with a single solution.

REMOTE ACCESS

Solutions that provide end-users with secure remote access to their on-premises workstations and networks from anywhere without compromising security.

WHO WE ARE

Lynx Solutions provides program management and Cybersecurity solutions to municipalities and utility providers who provide gas, electric, and water utilities to residential and business customers.

Our mission is to deliver high quality Cybersecurity and program management solutions that help protect those local municipalities as well as the information of their end cusotmers.
