

What is Diamond Maps

Diamond Maps is a cloud based GIS designed for sewer and water systems to help them keep track of their infrastructure.

Those starting from scratch love how easy it is to plot valve locations and draw pipes on the rich Google imagery backdrop. And existing GIS users move their data to Diamond because they love how their team can all manage pictures and notes and edit the map from any phone, tablet or PC.

And best of all, it costs just \$19/month.

Loved by small & medium size systems across country

"To say we are in love with Diamond Maps is an understatement"

-Michelle H Midwest Water Group

"I showed my map to the council last night, they were impressed"

-Jamie T, Greenwood WI

"Why hasn't someone done this before"

-Joe J, Coryell City TX

"Invaluable! Best tool out there for any size system period"

-Randall W, Sunny Hills FL

"It is user friendly and as handy as the pocket in my shirt"

-Frank O, Platte MO

"You have constructed an excellent tool"

-Jamie H, New York Rural Water Assoc

"I really like what I see"

-Don C, Illinois Rural Water Assoc

What's the next step

Our website at diamondmaps.com is full of videos, descriptions, and FAQ's but I recommend you call for an online demo where I can answer your questions and set you up with a 30 day free trial

ben@diamondmaps.com (317) 797-6824

Runs in your browser on any phone, tablet or PC with internet. Nothing to install or backup.

Draw points, lines, and areas. Take control of your GIS by giving your front line staff the ability to do adds and changes. All changes instantly appear on everyone else's screen.

Send a screenshot to your contractor with the share button

\$19/month gets you a single login that you can use on any computer. Or buy enterprise subscription to create logins for everyone

Import and Export Shapefiles, CSV, KMZ, Geodatabases. Control editing permissions.

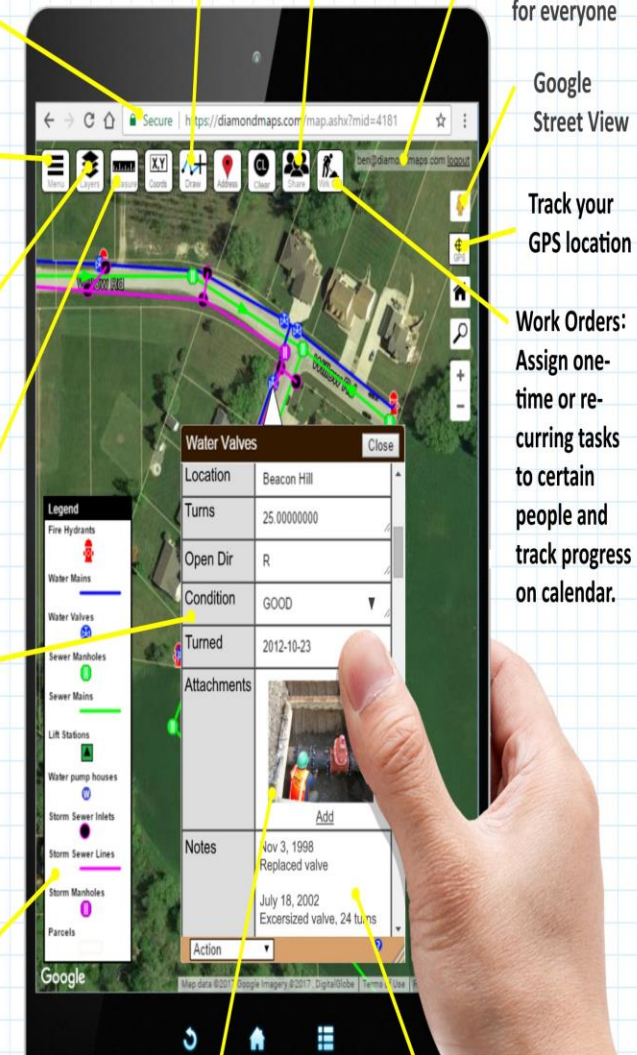

Browse, sort, search, locate, or export your list of assets.

Measure distances and areas. Mark elevations.

Click on anything you see on map for details. Customize each form with dates, pick lists, and even calculations.

Create or import layers for any purpose.

- Parcels
- Leaks
- Cross connections
- Water meters
- Valves
- Manholes
- Curb stops
- Best fishing spots

Google Street View

Track your GPS location

Work Orders: Assign one-time or re-occurring tasks to certain people and track progress on calendar.

Pictures you take in field are uploaded to our server. Mark on them in pic editor or attach other documents like manufacturer specs.

Add a note to the history log everytime you flush a hydrant, exercise a valve, inspect a manhole, etc. All your pics and notes in one place available to everyone on your team.
